

Production Promix

Higher Performance
Higher Profits

Quality and Service

"My business involves backgrounding cattle for the domestic and export markets.

With reduced amounts of quality feed available in these dryer seasons, achieving consistent high weight gains in a shorter period of time is crucial. That combined with higher fertilizer prices, I found it more efficient and cost effective to administer the required nutrients direct to the animal.

In the last two years I have used a variety of Nutramix products. Most recently, I have been supplementing feeder steers with Production Promix on Green Crop. In that time my cattle have achieved increased weight gains and improved animal health.

Production Promix is a quality addition to Nutramix's large range of supplement products, and together with their high level of professional service, I am able to provide a consistent supply of quality nutrients to my animals throughout the year while grazing on both green and dry feed."

— John Burton, "Thara", Coonamble NSW

Benefits of feeding Production Promix

- Significant improvement in weight gain on improved or poorer pasture
- "Finish" stock quicker on improved pastures and crops. Quicker turnover.
- Aid in reduction of scouring on lush pastures and crops
- Increase herd health and reduce associated costs
- Increase growth rates
- Provides balanced vitamin / minerals
- Safe to feed
- Increased breeder fertility

Nutramix
PERFORMANCE STOCK FEEDS AND SUPPLEMENTS

Performance

IS THE AIM OF THE GAME WITH

Production Promix

Production Promix is an innovative product designed by Nutramix to improve your herd's performance in a wide range of grazing situations. This product is a high energy, high protein and high quality loose mix, originally designed to improve performance of stock when grazing forage crops such as oats. It complements lush, green pastures by providing high fibre, which aids in the prevention of scouring and provides high energy to "finish" stock quicker.

Our high quality protein mixes are scientifically formulated to deliver a highly available source of protein within a safe and proven feeding program. Production Promix has also shown to be an effective alternative in other situations where increased protein and energy are required in the diet to improve weight gain on poorer quality pastures.

PRODUCTION PROMIX 8

Available with Urea content of 0%, 4%, 8% or 12%

Consumption Rates

Green feed: 200g to 600g
Minimal feed: 500g to 1000g

Analysis per kg

Total Protein	Min.	40%
Crude Protein	Min.	17%
Equivalent Crude Protein	Min.	23%
Urea	Max.	8%
Salt	Max.	5%
Crude Fibre	Max.	8%
Calcium	Min.	80g
	Max.	110g
Magnesium	Min.	10g
Phosphorus	Min.	15g
	Max.	20g
Sulphur	Min.	25g
Cobalt	Min.	10mg
Copper	Min.	150mg
Iodine	Min.	5mg
Manganese	Min.	220mg
Selenium	Min.	4mg
Zinc	Min.	500mg
Vitamin A	Min.	35,000IU
Vitamin D	Min.	5,000IU
Vitamin E	Min.	125mg

Advantages of feeding Production Promix

- Can be fed all year round, in any situation, whether you have high or low quality feed
- Designed as a high quality, performance loose mix
- Aims to provide higher energy to balance cattle diets when grazing on improved pasture
- Aids in faster finishing of livestock
- Provides cattle with higher level of fibre when grazing lush forage crops to help in reducing the incidence of scours
- Allows safe and effective supplementation of vitamins and minerals
- High palatability, provides stock adequate intakes while grazing improved pasture
- Improves weight gain of stock on low quality pasture
- Easy and safe to feed – no grain induced problems
- Provides a labour effective method of introducing and including Rumensin into grazing cattle diets
- Can be custom designed to match your feeding situation
- Is suitable for both sheep and cattle supplementation programs
- Excellent for backgrounding stock
- Ideal for spike feeding breeder stock.
- Cost effective option to maintain feeder cattle growth when grazing poorer quality pasture during late winter / early spring
- Very cost effective when compared with other supplementation methods.
