

Beef Sustainer 6%P

High quality loose mix to improve calving rates

1 Best value for money maintenance supplement

- ✓ A Copra / Cottonseed meal based dry lick containing 60g/ kg of Phosphorus, 30g /kg of Sulphur and a balanced vitamin / mineral content.
- ✓ Formulated to improve conception rates, improve herd health, and eliminate nutritional deficiencies.
- ✓ An ideal product to supplement breeders when pastures are green. It replenishes vitamins and minerals when cows are lactating and supporting calves.
- ✓ Purpose of Beef Sustainer 6% P is to offer the breeder every opportunity to cycle and get in calf at a low a cost.
- ✓ Commence supplementing Beef Sustainer 6% P, 6 weeks before joining to replenish the breeder with vitamins and minerals, while she is supplying milk to the calf. Continue to supplement over the entire joining period.
- ✓ High trace vitamin and mineral level that is formulated to replenish the breeder while they are dry preparing them for calving and enabling them to cycle quickly after calving.
- ✓ A supplement that has potential to be on every breeder property during joining and is extremely economical with a cost as little as 7c / head / day.
- ✓ Should be provided to stock throughout the joining period. Even when pasture is green, stock will consume it if they are craving Phosphorus. Use 0% Urea and No Salt on green pasture.
- ✓ Requires an increase in calving rates of only 1% to pay for itself. This does not include the benefits from increased milk from the cow, increased growth from the calf, earlier conception, lower vet costs etc.
- ✓ Nutramix offers unique flexibility with various urea and salt combinations to provide a customized dry lick to suit your situation and your required intake. We can offer other variations in dry licks such as Sulphur, trace elements etc.
