

# Cattle Finisher Pellets 16%

*The ultimate finisher pellet*

- ✓ Highly palatable, high energy and protein, grain based ration is designed to achieve high growth rates and finish cattle quickly.
- ✓ Safe to feed, supplying high levels of buffers to maintain rumen pH and reduce the incidence of grain derived metabolic problems such as acidosis and bloat.
- ✓ Contains high levels of vitamins and minerals to enhance stock growth and herd health.
- ✓ Contains adequate fibre levels to promote rumination, creating a healthy rumen environment that will improve feed utilisation and maintain safety of feeding.
- ✓ Contain the latest technology in molasses coating of the pellets, which improves acceptance of the pellet, dust reduction, pellet hardness and palatability. This minimises any incidence of "shy" feeders and greatly enhances the ease of starting cattle on the pellet.
- ✓ Is suitable to be fed to all classes of cattle that need to be finished quickly.
- ✓ A premium product containing only high quality ingredients, with an unmatched nutritional analysis.
- ✓ We encourage you to compare our product analysis with any competitors.

# Cattle Finisher Pellets 16% Nutritional Analysis

Compare our analysis and prices today!

Vitamin / Mineral Analysis (per kg)					
Protein	0.16 % min	Magnesium	0.35 % min	Selenium	0.85 mg min
Energy (ME)	12.00 MJ	Sulphur	0.35 % min	Zinc	150.00 mg min
Crude Fat	3.00 % max	Cobalt	2.00 mg min	Vitamin A	25,000 IU min
Crude Fibre	8.00 % max	Copper	35.00 mg min	Vitamin D	800 IU min
Salt	0.60 % min	Iodine	0.50 mg min	Vitamin E	40.00 mg min
Calcium	1.10 % min	Iron	90.00 mg min	Monensin	25.00 mg min
Phosphorus	0.50 % min	Manganese	80.00 mg min		

Contains 27.5 mg/kg Monensin Sodium as an aid to improve growth rate, feed efficiency and as an aid in bloat control.

## FEEDING GUIDE

- Commence feeding at a rate of 0.5% of body weight / head / day. Increase gradually over a 3 week period to 2.5% of body weight or at rate required to achieve target feeding goals.
- Ensure good quality roughage such as pasture, hay or straw is available at least over the first 3 weeks of feeding.
- Introduce gradually and do not let pellet supply run out.
- Feed in troughs or feeders. When feeding in self feeders, pellet intake can be regulated by adjusting the shutters. Lowering the shutters will reduce intake.
- Ensure sufficient trough space to minimise competition.
- Ensure supply of fresh, clean drinking water at all times.

## PELLET ADVANTAGES

- Easy to handle, can be augered and stored in silo.
- Runs very well in self feeders.
- Improved digestibility.
- Minimises wastage, reduces dust & eliminates separation of ingredients.

**AVAILABLE IN:** 20kg bag, 25kg bag, Bulk bag, Bulk

**STORAGE:** Store in a cool, dry place

## WARNING

- This product may contain urea, which may be poisonous to stock if consumed quickly or in excess.
- Use strictly as directed
- For Animal Treatment Only
- Do not feed to other animal species – may be fatal
- **This product does not contain restricted animal material**
