

Production Plus

High protein and energy grower loose mix

- ✓ A premium quality, high protein and energy, dry season supplement formulated to enhance growth rates of steers, heifers and sheep. Is a perfect product for backgrounding stock and growing out cattle or sheep; and an ideal supplement for maiden heifers and ewes to aid in reaching joining weight quickly and first calf heifers to provide higher protein and energy while they
- ✓ Does not contain any grain, energy is derived from protein meal.
- ✓ Can be fed all year round in any situation, whether you have high or low quality feed.
- ✓ Aids in faster finishing of stock, therefore quicker turnover.
- ✓ Is very effective in increasing weight gains on dry, low quality pastures.
- ✓ Easy and safe to feed – no grain induced problems. Has monensin added to aid in preventing bloat issues.
- ✓ Is mainly used for dry stock but can be used with breeders if pasture is limited or if breeders require more protein and energy to improve condition.
- ✓ Is commonly used to supplement breeders in areas where the stock generally don't take to supplements or where stock don't consume higher salt products.
- ✓ Provides supplementary protein, energy and minerals cost effectively for high growth rates and production through the dry season.
- ✓ Ideal for feeding to sheep and young cattle in blacksoil country where high salt levels in the drinking water, herbage or soil restrict intakes of higher salt mixes.
- ✓ Nutramix offers unique flexibility with various urea and salt combinations to provide a customised dry lick to suit your situation and your required intake. We can offer other variations in dry licks such as Sulphur, Magnesium, Trace Elements etc.

ADVANTAGES

- Substantially improves growth rates and grows out stock
- Improves turnover of stock and carrying capacity
- Puts a shine on the coat of cattle
- Safe to feed, with no metabolic issues
- Improves milk production, calf and lamb growth rate and weaner weights
- Reduces the incidence of bloat, prussic acid poisoning and grass and oat tetany
- Improves general herd or flock health
- Results in lower vet costs and time spent administering injections
- Extremely cost effective as shown on the cost benefit analysis overleaf
- High nutritional analysis, please compare with your current product
