Feeding guide

- Commence feeding at a rate of 0.5% of body weight / head / day. Increase gradually over a 3 week period to 1 - 1.5% of body weight or at rate required to achieve target feeding goals.
- Ensure good quality roughage such as pasture, hay or straw is available at all times.
- Feed in troughs, self feeders or on the ground.
- When feeding in self feeders, pellet intake can be regulated by manoeuvring the shutters, lowering the shutters will reduce intake.
- Ensure sufficient trough space to minimise competition.
- Ensure supply of fresh, clean drinking water at all times.
- Call a Nutramix Representative for more information.
