Ewe Promix

High quality loose mix for Ewes

- ✓ Is one of the highest quality loose mixes on the market for ewes, in relation to vitamin and mineral content. Contains high levels of protein and energy.
- ✓ Ewe Promix is a supplement that should be used on every sheep breeding property during joining and it is extremely economical with a cost as little as 0.5 cents / head / day.
- ✓ Ewe Promix is formulated to improve conception rates, improve flock health, eliminate nutritional deficiencies and improve the growth rate of lambs.
- ✓ Commence supplementing Ewe Promix 6 weeks before joining and throughout the joining period to replenish the ewe with vitamins & minerals, while she is supplying milk to the lamb. Even when pasture is green, stock will consume Ewe Promix if they are craving vitamins and minerals.
- ✓ Requires an increase in lambing rates of only 1% to pay for itself. This does not include the benefits from increased milk from the ewe, increased lamb growth rates, earlier conception and lower vet costs.
- ✓ The vitamin/mineral profile is designed to improve wool quality and reduce wool break.

UREA	0%	4%	8%
Total Protein (%)	22	32	42
Crude Protein (%)	17	15	14
Eq. Crude Protein (%)	5	17	28
Salt (%)	0-30	0-30	0-30
Crude Fat (%)	3.2	2.9	2.6
Crude Fibre (%)	4.4	4.1	3.8
